As a Full-Stack Developer at Dalet, you will join a team of highly skilled, energetic engineers working in an Agile environment part of the company's R&D.

You will work on projects that span technologies, systems and processes, you will liaise with Product, Design and Operations daily and will have ownership over the important functionalities.

Position Description

- Design overall architecture of the web application
- Maintain quality and ensure responsiveness of applications.
- Collaborate with the rest of the engineering team to design and launch new features.
- Evaluate and provide feedback to UX/UI in terms of technical feasibility
- Write fast, efficient and scalable code that meets acceptance criteria

Education/Experience

- Bachelor's Degree in Computer Science or related field preferred. Master's degree a plus.
- Experience shipping production code: at least 3 years' experience in both client-side and server-side development
- Well versed in Java and JavaScript development
- Development experience with AngularJS, ReactJS and Node.JS
- Experience with CSS/CSS3 and HTML/HTML5
- Results driven with strong commitment. Get things done.
- Familiar with agile development and unit testing methods.
- Must be analytical, adept to problem solving, and have a strong attention to detail.
- Good knowledge of English (written and spoken).
- Self-educated and highly motivated
- Good communication skills

About Gefen Dekel

Gefen Dekel Technologies is an affiliate company of Dalet (www.dalet.com) and is the main R&D center of the company.
