DEFENSE

Position: Javascript Guru

General Information

- Position: Full time
- Start date: Immediate
- Location: Beer-Sheva\Hasharon Area

About us

In an industry focused on detection, Source Defense provides websites with the first ever prevention technology for attacks of third-party origin. We are the first ever SAAS platform that allows a site owner to set and enforce permissions, receive real time alerts and monitor third-party vendors' behavior on their site. By removing the security considerations from third-party integrations, we can save countless man-hours spent on tests and integrations, allowing sites to focus on generating revenues and new opportunities while keeping the site visitors safe and the site in high performance.

About you

You are a Javascript Guru with experience developing complex Javascript applications. You have extensive knowledge of Browsers behavior and W3C Standards. You “live and breathe” MDN and there is no HTML5/JS/CSS question you can't answer and no new web technologies that pass you by. You're good at taking ownership of your tasks and work with others on complete your commitments. You're self-motivated, self-taught and work well in teams as well as independently.

As a Javascript Guru your responsibilities are

- To be the main focal point of knowledge for a team of JS experts
- Foreseeing and predicting in advance technical problems and finding solutions
- Help identify and resolve Javascript performance issues
- Find solutions to technical problems
- Research latest changes in W3C and Browser
- Help research and design a one of kind, cybersecurity product

Must Have Qualifications

- Fluent in JavaScript, HTML5, CSS.
- Experience with Identifying and resolving Javascript performance issues
- A self-learner with strong planning, coding and troubleshooting skills who is not afraid of a challenge.
- Strong team player.

Nice to Have Qualifications

- B.Sc. in Computer Science or a related field or equivalent experience.
- Previous work experience with 3Rd Party company
- Understanding of Agile methodology.
- Experienced with TDD methodology.
