**Sigmabit Research Labs**

## Semantic Technology algorithm developer

Sigmabit Research Labs is looking for a creative and analytical algorithm developer to join our cognitive systems group. We create sophisticated adaptive algorithms that use statistical learning and semantic technology to solve complex problems.

The ideal candidate would have:

- MSc in CS \ Physics \ Engineering \ Statistics \ Applied Math
- PhD in a relevant field – a significant advantage
- Experience in algorithm development
- Solid background in Semantic Technology
- Experience with graph database/linked data/semantic web
- Experience with building ontologies
- Experience with OWL, RDF, and Ontology repositories
- Experience with large volumes of information (Big Data)
- Good communication skills

About Sigmabit:

A subsidiary of Elbit Systems, Sigmabit is a fast-growing start-up company in Beer Sheba. We develop innovative solutions and cutting-edge Big Data and Cyber technologies. We offer a dynamic environment backed by a global leader.
