DEFENSE

Position: Automation Engineer

General information:

- Full time position
- Start date: Immediate
- Location: Beer-Sheva

About us

Source Defense provides websites with a monitor and prevention technology against attacks originating from third-party JavaScript. We are the first ever SAAS platform that allows website owners to set and enforce permissions, receive real time alerts and monitor third-party vendors behavior on their site. By removing the security considerations from third-party integrations, we are allowing websites to focus on generating revenues and new opportunities while keeping the website visitors safe and the site in high performance.
