

Performance / DevOps Engineer

Responsibilities:

- Design requirements for performance Load Model and test plan accordingly. Define the performance scenarios based on use cases and inputs provided by Product Management and customers.
- Coordinate with architects, project managers and tech leads in designing and implementing holistic performance test strategy for complete coverage of product performance testing
- Bottleneck Identification - Must be able to use the test results to identify the location of a performance bottleneck, in collaboration with technical subject matter experts.
- Report performance issues within all product layers (Client, Server and Database) including 3rd party integration
- Building and maintaining continuous integration scripts for automated code releases and processes
- Support R&D on tasks related to source control, build, packaging and deployment.

Requirements:

- Ability to summarizing large amount of metrics into meaningful graphs and reports according to load model requirements
- Experience with a variety of performance related tools and understanding performance KPIs of throughput, latency, memory and CPU utilization
- Experience with Databases – MS SQL, SQL Express, SQL Light
- Experience with both Endpoint and Server application testing
- Conducting load models with performance & benchmark testing, analysis, troubleshooting, and optimization for large scale enterprise systems
- Knowledge of C#.
- Experience with PowerShell – An advantage
- Experience with LINQ – An advantage
- Familiarity with WMI and WCF – An advantage
- Familiarity with Jira/Jenkins – An advantage
- Familiarity with VSTS, Web and Load Testing– An advantage
- Excellent communication and interpersonal skills in both Hebrew and English.

Advantage:

- Jfrog artifactory
- Static code analysis tool such as:
 1. TypeMock
 2. SonarCube
- Ansible
- Familiar with Linux operation system.
- Python / Iron Python.

Education:

- BA in Computer Engineering or similar

General Information:

- Full time position.
- Start Date: Immediate.
- Languages: Hebrew / English
- Location: Technology Center – Beer Sheva
