Firmware Student

Overview

We are looking to hire a Firmware Engineer/Student to join Mellanox's R&D team. The work environment is versatile, educational, dynamic and challenging as our employees are currently working on innovative, next-generation networking devices at the forefront of technology. The daily work involves all aspects of firmware development: Design, Micro- Architecture, Software interfaces and Verification. Work with the best and become one of the best!

Responsibilities

Mellanox believe in developing our employees and giving them the tools to succeed. We are a fast-growing company with positive energy that emanates from our team members' internal drive to develop, market, sell, and support cutting-edge products and services. At Mellanox each individual contributes to the success of our company. If you are looking for a rewarding career, talented colleagues, and a great environment in which to challenge yourself, grow, and lead, Mellanox is the right place for you.

Qualifications

B.Sc. in Computer Engineering/Electronic Engineering/Communication Engineering/Computer Science
