Student Analyst

We're looking for a results-oriented student to join our BA team as a Business & Product Analyst.

Passionate and independent, you'll define, analyze and draw tangible conclusions about our users and product data. Focusing on customer behavior and segmentation, your tasks will include writing queries, preparing reports, investigating changes in trends and managing ongoing A/B tests. We're a data-driven company, and this is an amazing opportunity to play a hands-on role in influencing our business and product decisions.

Responsibilities:

- See beyond numbers and help to inform, influence, support and execute our business decisions
- Provide Product Managers business insights and recommendations based on data
- Drive a data driven culture in your business unit
- Define the right metrics to analyze
- Build and maintain reports and dashboards
- Analyze and optimize products and activities
- Plan, launch and analyze AB test on products

Requirements:

- 3rd/4th year BSc/BA students in a quantitative field
- Analytical approach
- Business orientation
- Expert Excel skills
- Proven knowledge of SQL
- Ability to work half time (~22 hours/week)
- Fluent English

Bonus Points:

- Demonstrable experience in building complex, robust, dynamic, and scalable analyses and models
- Experience working with Big Data and BI tools (Tableau, Python, R, etc.)
- Technological and business understanding

- Experience at Internet/online companies
