

Web Client Developer

We are looking for a strong SW Developer to join our client group.

Responsibilities

In this position you will contribute directly to our cutting edge client platform which is used by millions of people around the globe every day to build gorgeous websites. We work in small teams, follow agile work methods and use continuous integration/deployment methodologies to run quickly as a startup while maintaining the high end quality of our product.

Requirements

- Exceptional proficiency using HTML/CSS/Javascript/AJAX
- Strong understanding of JavaScript; including functional programming, prototypal inheritance, and common patterns
- Experience with a client MVC framework like Backbone.js, Ember.js, Angular.js, etc.
- BS in Computer Science, Computer Engineering
- Understanding of front-end performance characteristics
- Experience solving cross-browser compatibility issues

Bonus Points:

- Mastering JQuery
- Experience developing JQuery plugins
- Experience with a server MVC stack like Rails or Express
- Open Source projects to show off
